Hello, I have a problem in counter strike 1.6 portable, it tells me that it can't load the authentication library, exiting, what can i do? CS 1.6 ve GO'da ... I installed and configured the program and it works correctly. I would like to understand why. I don't want to use a server. I want to use this cs1.6\_go.exe to play locally. But it told me that I need to download and install the authentication library. Thank you in advance This library is what you get after installation. Here is a link to it, which you must install. I don't know why he can't install it without a problem. I did some research and found this link.
